Classes

`class ApiService`

`class ApiServiceCMD`

`class ApiServiceCMF`

`class ApiServiceCliente`

`class AnalyticsService`

AnalyticsService se encarga de la lógica de negocio para analizar datos de inventario y ventas. Se conecta al ApiService real para obtener datos de ventas mensuales.

`class CambioPrecioViewModel`

`class CartManager`

`class ClienteViewModel`

`class CoreDataStack`

`class CreaProductoViewModel`

`class EtiquetaViewModel`

`class FronteraViewModel`

`class HacerPedidosViewModel`

`class HomeScreenViewModel`

`class HomeViewModel`

`class OfflineProductsViewModel`

`class OrdersListViewModel`

`class ProactiveAssistantViewModel`

ViewModel para la funcionalidad de "Asistente Proactivo". Gestiona la lógica de negocio para generar alertas de inventario inteligentes.

`class ProductCardViewModel`

`class ProductEntity`

```
class ProductRepository
class ProductViewModel
class RoleEditViewModel
class RoleManagementViewModel
class ScannerViewController
class SettingsManager
class SyncProductsViewModel
```

Protocols

```
protocol CameraScannerViewDelegate
```

Structures

```
struct AboutView
struct AccesoScreen
struct AccesoScreen_Previews
struct ActionGridButton
struct ActionGridButtonLabel
struct ActivationView
struct AddProductToOrderView
```

```
struct AgotadoProduct
```

Modelo para un producto agotado, tal como lo devuelve el endpoint `/api/productos-agotados/`. Es Identifiable para poder usarse en listas de SwiftUI.

```
struct AppMenuView
struct AreaDetail
struct Articulo
struct Badge
struct CambioPrecioView
struct CameraScannerView
struct CardView1
struct CartBadgeView
struct CartBadgeView_Previews
struct CashRegisterDetail
```

```
struct CashRegisterSummaryItem
struct ChartDataPoint
struct ChartEntry
struct ChartableSalesByHour
struct CitymallResponse
struct Cliente
struct ClienteDetailCardView
struct ClienteResponse
struct ClienteScreen
struct CodigoBarra
struct CompraHistorial
struct ComprasScreen
struct ConfettiView
struct ConsultaCodigoBarraRequest
struct ContentView
struct Coupon
struct CouponDialogModernView
struct CouponResponse
struct CreaProductoView
struct CreaProductoView_Previews
struct CreateOrderItem
struct CreateOrderRequest
struct CurrentOrderScreen
struct CustomButtonStyle
struct CustomIntPicker
struct CustomPicker
struct CustomSectionStyle
struct CustomTextField
struct DashboardEmptyStateView
struct DashboardScreen
struct DashboardScreen_Previews
```

```
struct Departamento
struct DepartamentoResponse
struct DetailCard
struct EmptyClienteStateView
struct EmptyStateView
struct ErrorState
struct ErrorView
struct EtiquetaScreen
struct FeaturedSummaryCard
struct FilterChip
struct FilterChipButtonStyle
struct FinancialChartView
struct FronteraCardView
struct FronteraDetailsView
struct FronteraScreen
struct FronteraScreen_Previews
struct HacerPedidosScreen
struct HistoryChartView
struct HomeScreen
struct HomeScreen_Previews
struct InfoData
struct InfoRow

struct InventoryAlert
    Representa una alerta de inventario para un producto específico. Es identificable para poder usarse en listas de SwiftUI.

struct InventoryAlertCardView
    Una vista de tarjeta que muestra una única alerta de inventario.

struct ItemRow
struct ItemsListView
struct ListaDePrecioParaCrear
struct MainView
struct MainView_Previews
```

```
struct ModernCashRegisterRow
struct ModernChartCard
struct ModernFormCard
struct ModernLabeledContent
struct ModernPromoRow
struct ModernSalesAreaDetailCard
struct ModernSearchBar
struct ModernSectionView
struct ModernStatCard
struct ModernSummaryCard
struct ModernTextField
struct ModernToggle
struct MonthlySaleRow
struct NewSaleDetailCard
struct NewSalesDetailView
struct OfflineProductsView
struct Operator
struct OperatorOrderSummary
struct OperatorSummaryCard
struct OrderDetailView
struct OrderDetailView_Previews
struct OrderHeaderView
struct OrderItem
struct OrderItemResponse
struct OrderItemRowView
struct OrderRow
struct OrderSummaryCard
struct OrdersListScreen
struct OrdersListScreen_Previews
struct PaginatedAgotadoProductResponse
```

Modelo para la respuesta paginada del endpoint `/api/productos-agotados/`.

```
struct PaginatedOperatorResponse
```

```
struct PaginatedOrderResponse
```

```
struct PaginatedProductResponse
```

```
struct PaginatedReceiptResponse
```

```
struct PermissionDTO
```

```
struct PrecioSucursal
```

```
struct PriceList
```

```
struct ProactiveAssistantView
```

La vista principal para el "Asistente Proactivo".

```
struct Product
```

```
struct ProductCardView
```

```
struct ProductDetailResponse
```

```
struct ProductDetails
```

A structure to hold detailed information about a product.

```
struct ProductDetailsButtons
```

```
struct ProductDetailsModern
```

```
struct ProductScreen
```

```
struct ProductScreen_Previews
```

```
struct ProductoCreadoResponse
```

```
struct ProductoParaCrear
```

```
struct Productos
```

```
struct PromocionesSectionView
```

```
struct Promotion
```

```
struct PromotionModernCardView
```

```
struct PurchaseDataPoint
```

```
struct PurchaseDetailCard
```

```
struct PurchasesDetailView
```

```
struct PurchasesHistoryChartView
```

```
struct Receipt
```

```
struct ReceiptItem
```

```
struct ReceptionSummary
```

```
struct Referencia
struct ReferenciaProducto
struct RequestOrderResponse
struct Resultado
struct RoleDTO
struct RoleEditView
struct RoleEditView_Previews
struct RoleManagementView
struct RoleManagementView_Previews
struct SafariView
struct SalesByHourDetailItem
struct SalesByHourItem
struct SalesDataPoint
struct SalesDetailView
struct SalesHistoryChartView
struct SalesResponse
struct SalesSummaryItem
struct SearchBar
struct SearchBarView
struct Secrets
struct SectionHeaderStyle
struct SeriesAsociadas
struct SettingsView
struct SettingsView_Previews
struct ShareSheet
struct StatusBadge
struct StatusTagModern
struct SummaryCard
struct SyncProductsView
struct TabItem
struct TotalDescuentos2Item
```

```
struct TotalDescuentosItem

struct User

struct UserResponse

struct Venta

struct VentaEgresoItem

struct VentaHistorial

struct VentaIngresoItem

struct VentaMensual

struct VentaNotaDeCreditoItem

struct VentaResponse

struct VentasScreen

struct ViewLogsScreen

struct iOSSigApp
```

Functions

```
func convertClarionDateToString(clarionDate: Int?) -> String
```

Enumerations

```
enum APIError

enum AppUserRole

enum Compras

enum DataSource

enum OrderStatusFilter

enum OrdersListState

enum SummaryValueFormat

enum UserRole

enum Ventas
```
